MSRP: \$3,500

The Comet DAC

The EXOGAL Comet is a high performance digital to analog audio converter (DAC). Just connect your computer, or other digital/analog source, and experience exceptional audiophile quality sound. The Comet DAC does everything you would expect a high-end DAC to do, including balanced and unbalanced analog outputs, digital volume control and asynchronous USB input. Audio signals are processed using EXOGAL up-sampling and filtering technology. The USB input can accept up to 32-bit/384kHz PCM data rates, DSD64, and DSD128 in DOP (DSD over PCM) format.

The Ion PowerDAC, now with HyperDrive Technology

The EXOGAL Ion is a high performance digital amplification solution that is designed to be an integrated companion to the COMET. The Ion connects to the Comet via the EXONET interface and provides 250 watts per channel (into 4 ohms) and 125 watts per channel into 8 ohms. The Ion and Comet integrate fully and seamlessly with no complicated remote controls, apps or special requirements—the Comet handles it all for you! HyperDrive gives you better frequency response at all levels, a more articulate overall presentation, and more protection for your speakers and your system.

MSRP: \$4,250

The Comet Upgrade Power Supply

The EXOGAL Comet Plus Power Supply gives you the power to squeeze out that last drop of performance from your Comet DAC! It provides plenty of Power to stretch out and render the highest highs, drive the deepest bass, and let the Comet deliver the richest, most authentic sound of any DAC on the market.

MSRP: \$600

The New EXOGAL Vortex Network Hub Family

The EXOGAL Vortex family is a line of streaming devices that allow you to choose the appropriate features that best fit your listening style. They all include our new Advanced EXOGAL Clocking System which is a high-precision, ultra-low jitter Master Clock that intelligently synchronizes all EXOGAL products, both upstream and downstream. The entire Vortex family is compatible with all existing EXOGAL products. The entire Vortex family streams and plays network files and all the popular streaming services and as you move up the family line you gain additional convenience features as well. All members of the Vortex family are Roon Ready compatible endpoints.

The VORTEX X1

\$1,500

The entry-level EXOGAL Vortex X1 is a network-only streaming endpoint that works with computers, files stored on a file server on your network, and internet-based streaming services.

The VORTEX X2

\$2,000

The EXOGAL Vortex X2 has all the functionality of the X1, with the addition of a full-featured USB hub.

The VORTEX X3

\$2,500

The EXOGAL Vortex X3 has all the functionality of the X2, with the addition of a four TOSLINK inputs and two Coax inputs. This allows the X3 to connect to digital audio players such as CD players, as well as home theater and video systems such as cable and satellite receivers, video games, and video streaming boxes. This allows your EXOGAL system to be the high-quality audio output of all your entertainment choices—not just your music.

The VORTEX X4

\$3,000

The EXOGAL Vortex X4 has all the functionality of the X3, with the addition of a high-quality headphone amplifier and a front mounted 1/4" headphone jack. The X4 by itself is capable of acting as an integrated, dedicated headphone listening station including streaming, DAC and amplifier all in one compact, beautiful package.
